type of fastener, in some  
ways similar to a bolt (see  
Differentiation between bolt

and screw below), typically  
made of metal, and  
characterized by a helical  
ridge, known as a male  
thread (external thread).  
Screws are used to fasten  
materials by digging in and  
wedging into a material  
when turned, while the  
thread cuts grooves in the  
fastened material that may  
help pull fastened ... Sat, 08
